# Upgrade AE Browser Support

Browser development continues to progress. We want to use the new features. For this reason, there are new requirements regarding the suitable browser. In general, newer versions are necessary and Firefox is no longer supported. Internet Explorer has not been used since 2018 due to poor performance and non-standard syntax.
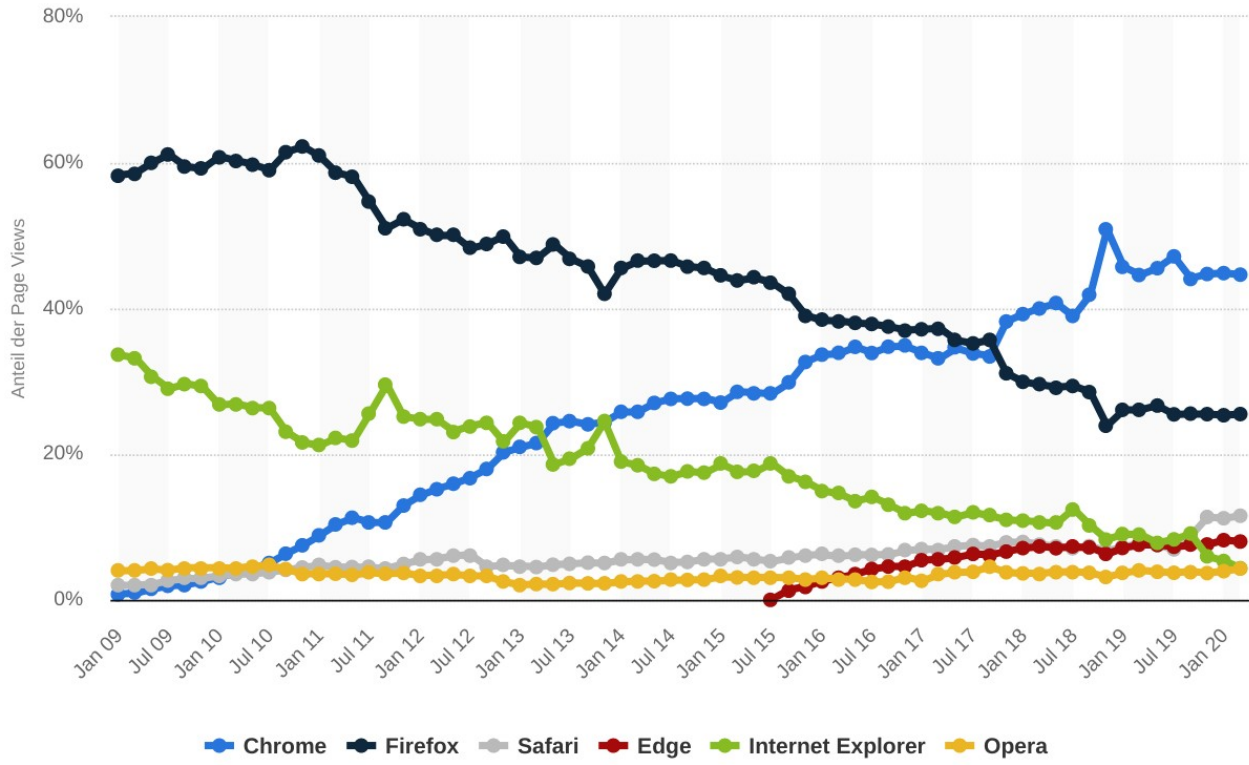

The following browsers are supported from AE software version G-3.0.1:

Edge 79+   Chrome 69+   Opera 64+   Chrome for Android 81+   Samsung Internet 10+

64.7% of the browsers used worldwide and 58.5% of the browsers used in Germany are supported, as the two graphs below from de.statista.com show. The global share of Firefox is only 7.3%.
